## CORN HYBRIDS TECH INFO SUMMARY

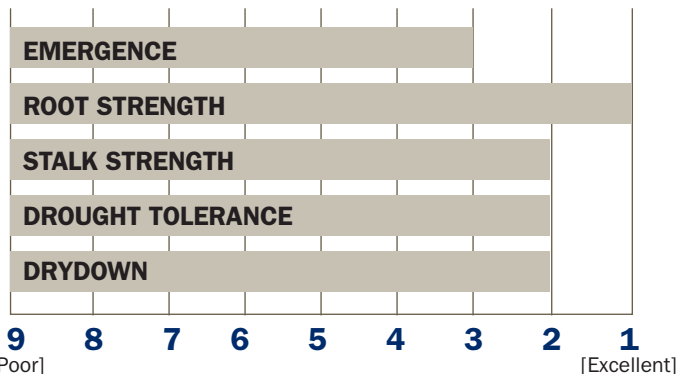

### POSITIONING AND MANAGEMENT

This hybrid was originally brought into the lineup as a defensive hybrid with good yield. But this hybrid can win plots, too. It has a very high rating for vigor and for emergence, so it can be planted early for high yield. This hybrid also carries the highest rating for root strength to help anchor it in loose, high-organic matter soils, yet extract more nutrients in less fertile soils. Look for even more consistent rootworm control with LH 4849 VT3, one of only four hybrids in the 2008 lineup with the new second-generation corn rootworm technology.

## 98 RELATIVE MATURITY 98 DAYS

LH 4849 VT3

GENERAL CHARACTERISTICS	
•	Girthy ears with high-yield potential
•	Fast drydown
•	Medium plant and ear height
•	Excellent roots with very good stalks
•	Very good drought tolerance
