

LH 5045 HXTLL

CORN HYBRIDS TECH INFO SUMMARY

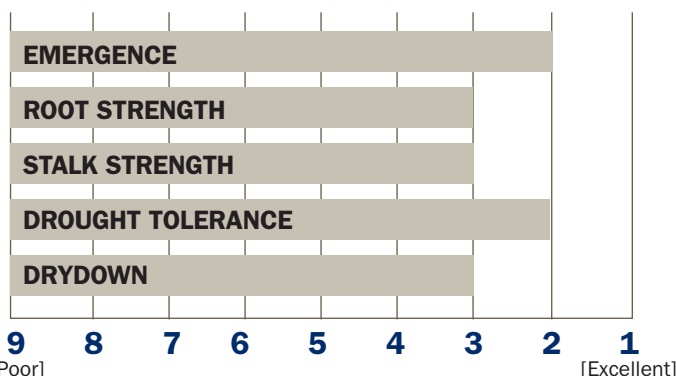

POSITIONING AND MANAGEMENT

This hybrid has very high yield potential. The Herculex Extra (HT) trait provides in-plant Rootworm, Black Cutworm and Western Bean Cutworm control. The emergence rating is a 2, making it a hybrid that can be planted early in cool and wet soils and yet come out of the ground very fast. Drydown is also good which allows for early harvest, or for harvesting corn that can go right into the bin. The yield potential suggests this hybrid has the best fit for high-yielding fields.
