CORN HYBRIDS TECH INFO SUMMARY

POSITIONING AND MANAGEMENT

LH 5784 HXT is a new 107-day hybrid originally brought into the lineup as a glyphosate-tolerant refuge hybrid. We are now offering it also in the Herculex Extra trait package. It has very good roots and stalks to help it withstand the feeding from corn borer and rootworms. Its medium green canopy color makes it less attractive to corn borers. This hybrid also has excellent drought tolerance for sandy soils or where water is limiting on clay side hills
