CORN HYBRIDS TECH INFO SUMMARY

POSITIONING AND MANAGEMENT

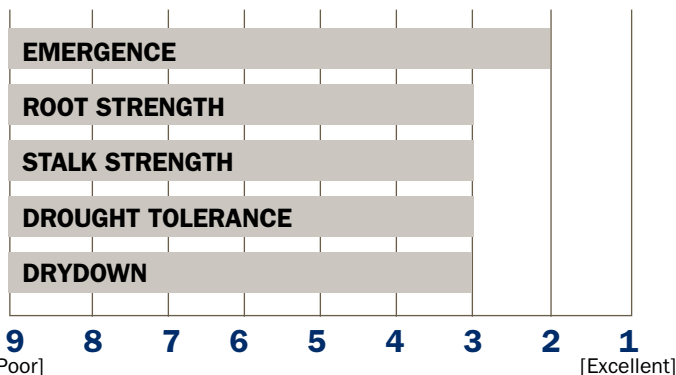

This genetic package is high yielding and widely adapted across a large area. It is available in LH 6056 VT3 and LH 6057 SS SmartStax trait packages. It has an excellent disease package but use fungicides east of I-35 especially if you are planting corn on corn. This is a hybrid that will respond very well in high management situations with terrific upper end yield potential.
