CORN HYBRIDS TECH INFO SUMMARY

POSITIONING AND MANAGEMENT

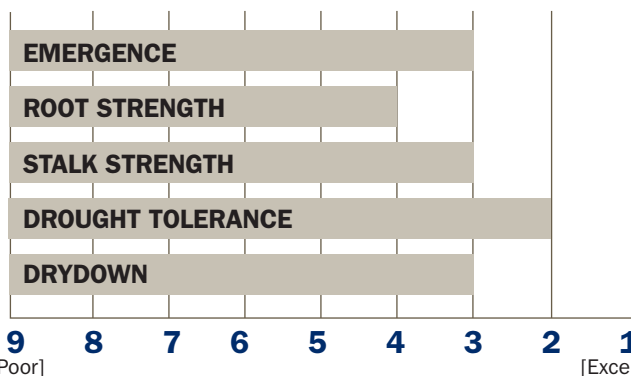

Place LH 6448 VT3 in high-yield environments for best performance. The corn rootworm trait protects it from rootworm damage. However, do not put this hybrid in compacted soil situations where root growth could be limiting. The genetics for this hybrid allow it to handle drought stress well. LH 6448 VT3 has good emergence and strong vigor to allow it to be planted early in cold, wet soils. The ear flex will allow this hybrid to do well at lower planted populations as well as improved stalk strength.

LH 6448 VT3

LH 6447 TS

GENERAL CHARACTERISTICS

- Flex ear with top-end yield potential
- Medium plant and ear height
- Good roots and stalks
- Excellent plant vigor with good emergence
- Very good drought tolerance
