

LH 6598 VT3

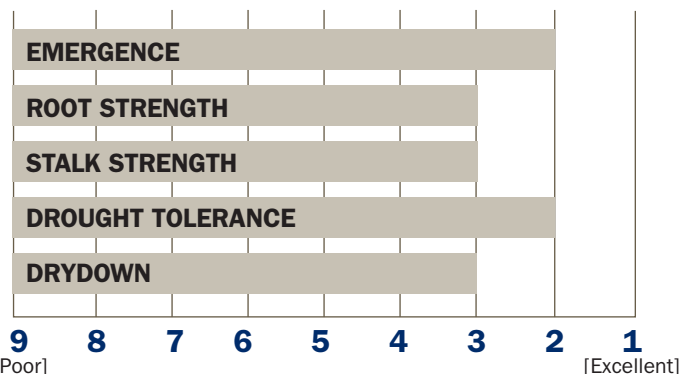

CORN HYBRIDS TECH INFO SUMMARY

POSITIONING AND MANAGEMENT

This hybrid is a medium-tall racehorse. Place it in high yield environments for best performance. High yield potential and tall plant height allow LH 6598 VT3 to be used effectively for high tonnage and energy silage. The rootworm trait protects the roots from rootworm damage, however, do not put this hybrid in compacted soil situations where root growth can be limiting. This hybrid has good emergence and strong vigor, allowing it to be planted early in cold, wet soils. The ear flex will allow this hybrid to do well at lower planted populations, as well as improve its stalk strength.

LH 6598 VT3

GENERAL CHARACTERISTICS

- Flex ear with high-yield potential
- Tall robust hybrid, dual purpose for grain and silage
- Medium ear height
- Good roots and stalks
- Excellent plant vigor with good emergence
